called “Express Open”. During Express Open operation, any movement of the sunroof switch will stop the sunroof.

**Opening The Sunroof — Manual Mode**
To open the sunroof, press and hold the switch rearward to full open. Any release of the switch will stop the movement and the sunroof will remain in a partially opened condition until the switch is pushed and held rearward again.

**Closing Sunroof — Express**
Press the switch forward and release it within one-half second, and the sunroof will close automatically from any position. The sunroof will close fully and then stop automatically. This is called “Express Close”. During Express Close operation, any movement of the sunroof switch will stop the sunroof.

**Closing Sunroof — Manual Mode**
To close the sunroof, press and hold the switch in the forward position. Any release of the switch will stop the movement and the sunroof will remain in a partially closed condition until the switch is pushed and held forward again.

**Pinch Protect Feature**
This feature will detect an obstruction in the opening of the sunroof during Express Close operation. If an obstruction is detected, the sunroof will automatically retract. Remove the obstruction if this occurs. Next, press the switch forward and release to Express Close.

**NOTE:**
If three consecutive sunroof close attempts result in Pinch Protect reversals, the fourth close attempt will be a Manual Close movement with Pinch Protect disabled.

**Pinch Protect Override**
If a known obstruction (ice, debris, etc.) prevents closing the sunroof, press the switch forward and hold for two seconds after the reversal occurs. This allows the sunroof to move toward the closed position.

**NOTE:**
Pinch protection is disabled while the switch is pressed.

**Venting Sunroof — Express**
Press and release the “Vent” button, and the sunroof will open to the vent position. This is called “Express Vent”, and will occur regardless of sunroof position. During Express Vent operation, any movement of the switch will stop the sunroof.

**Sunshade Operation**
The sunshade can be opened manually. However, the sunshade will open automatically as the sunroof opens.

**NOTE:**
The sunshade cannot be closed if the sunroof is open.

**Wind Buffeting**
Wind buffeting can be described as the perception of pressure on the ears or a helicopter-type sound in the ears. Your vehicle may exhibit wind buffeting with the windows down, or the sunroof (if equipped) is in certain open or partially open positions. This is a normal occurrence and can be minimized. If the buffeting occurs with the rear windows open, open the front and rear windows together to minimize the buffeting. If the buffeting occurs with the sunroof open, adjust the sunroof opening to minimize the buffeting or open any window.
